### **4.0 OLD BUSINESS**

#### **4.1 Crosswalk**

- letter from Charlie said to evaluate again in the spring
- signs out front changed
- why is bus parking in the back? Can't the bus laner be moved to the front?
- it could be done but the road would have to be widened, but it's a long process to do this from Alberta Education
- buses could loop in, drop off, and go
- approach the city to make a decision-either yes or no; if it is no, then what action will be taken? What is the alternate? We paid for a study that said crosswalk was needed
- 80 or more kids per day are jaywalking; Ecole Dansereau Meadows School has two crosswalks!!! And only one of the crosswalks is monitored to determine this (at the four way, there's no monitoring, but at the one that is less used, is being monitored)

-it's not that they are saying no, it's that they are not saying anything...administration is different than Council; a lot of councillors have been unaware of the problem whereas administration is aware

-table it till spring

-Karla will present to Council in the New Year (10 minutes)

-Karla has logged all the meeting dates with council, and all the emails which will help the presentation
